

KAS Final Research Statistics on Marriage/Relationships

by
Sandy Crowther

Statistics for 1042 Charts: (USA Charts)

332 Charts met limited criteria and have or had problems

115 Charts met limited criteria but have no relationship problems

490 Charts did not meet the limited criteria, but DO HAVE marital/relationship problems (re-evaluated below).

105 Charts were disqualified from the study (non-applicable to the research subject).

Totals: 1042 Charts

Problematic Marriages/Relationships:

332 Original Problematic Charts

352 Additional Problematic Charts (re-evaluated using Krishna's revised criteria below)

684 Total number of Charts (meeting problematic criteria)

So out of the remaining **490** charts that did **not** meet the original criteria but have/had relationship problems, with the revised criteria (listed below) and re-evaluations we now have **352** additional problematic charts, making the total of marital/relationship charts with problems to now total **684** charts.

1042 Total Charts in researched database

-105 Charts were disqualified (irrelevant to Research material)

937 Control Charts used in Final Research

Applicable Marriage/Relationship Research Database (937 charts)

684 Total Charts with Relationship Problems: 73 %

138 Charts need further KAS Worksheet Analysis: 14.7 %

115 Charts met criteria but are *not* problematic: 12.3 %

937 Charts Qualified for Research **100 %**

So 73% have currently met the Research Control Parameters as significator's for "Problems in Relationships/Marriage".*

*!There is potential for up to 87.7% for positive results (73% + 14.7%) of data after KAS Worksheet Analysis is completed and added to the 73%.

332 Charts: (Original) Venus in Krittika, Venus in Ardra, Venus in Mula, and Jupiter in Libra.

352 Charts: (Revised) Using revised criteria as issued by Krushna (below):

Krushna's additional criteria (below) was then applied to the remaining 490 problematic relationship charts:

71.9% of the 490 charts met with the controlled criteria. (352 charts)
28.1% of the 490 charts need KAS Worksheet analysis to determine final results. (138 charts)

Krushna's Additional Criteria Controls:

For relationship/marital problems we should check following things along with what you have pointed out:

- 1) Difference between Sun and Ve more then 43 Degrees and aspected by Saturn, (one of the luminary must also be under aspect of Saturn)*
- 2) Jupiter in Ascendant with more points.*
- 3) Ju as sixth lord, aspecting 2nd and 7th lord*
- 4) Sixth lord in 4th house with more points.*
- 5) Lord of 1st and 7th house in 2:12 or 6:8 relations.*
- 6) Ju in Libra sign or navmansha*
- 7) If Ve is with in 3 degrees from Sun gives no interest in marital relations*
- 8) Ve in Sun's nakshtra reduces the quality of Venus.*

If at least 2/ 3 combinations are present, marital life is a problem.

Following combinations are powerful to create problem in marital relationship.

- 9) Ve in Krittika, Aradra, or Mul (& Jestha) nakshatra,*
- 10) 7th lord in sixth and under aspect of Sa or Ma.*

If the remaining charts are having above combinations, those should be added to 332 charts.

For other charts where none of above combinations are presents, but are having dispute, We should check for pts in Ws for 7th house if married and for living to gather only with out marriage points for 5th and 12th must be low.

KAS Final Statistical Breakdown on Research of 684 Charts

Charts:	Control Parameters:	Percentage
42	Venus in Krittika	6.1%
40	Venus in Ardra	5.9%
